SUMMARY

First-class honors graduate in computer and robotic engineering, specializing in HTML, CSS, JavaScript, Python, and C. Experienced in developing web applications as an outsource for SCG, enhancing document management, inventory, and logistics systems. Skilled in problem-solving, critical thinking, and time management. Seeking a career as a Full-Stack Developer or Frontend Developer.

UNIVERSITY PROJECTS

Web Application Development

- Developed a web application for users to review a variety of services and locations, including cafes, toilets, food and travel destinations.

Kibo Robot Programming Challenge

- Won 3rd prize winner in the Kibo Robot Programming Challenge, an educational program for free-flying robots on the International Space Station (ISS)

Graduate Project

- Created a vending machine and developed a programmed website for ordering coffee

WORK EXPERIENCE

Internship, IONECT CON., LET.

Jun 2023 - Jul 2023

- Create AI for Object Detection and Segmentation for blurring using OpenCV and YOLOv8

Outsource for SCG

Nov 2023 - Present

- Document Management System:** Developed a web application enabling users to securely save and manage important documents and cloud storage solutions.
- Warehouse Inventory Management System:** Developed a web application for managing warehouse inventory, improving inventory tracking and control.
- Logistics and Transportation Management:** Developed a web application to optimize logistics and transportation operations
- Chilled Goods Transportation Management:** Developed a specialized web application for managing the transportation of chilled goods, ensuring compliance with temperature control requirements and enhancing delivery accuracy.
- Goods Receipt Management:** Developed a web application to manage goods receipt processes, reducing errors and improving the accuracy of inventory records.

EDUCATION

Bachelor of Computer and Robotic Engineering

Aug 2019 - May 2023

Bangkok University

- First-Class Honor
- GPA: 3.53

TECHNICAL SKILLS

HTML, CSS, ReactJS, JavaScript, TypeScript, Python, C, C++, C#, jQuery, .NET Core, SQL Server, MongoDB, Firebase
