

ABOUT ME

My habits: I am a person who enjoys continuously learning new things. I am a quick learner, diligent and very patient. I prefer to program about robots or machinery, which gives me a lot of programming passion and allows me to be competent at programming hardware in Python, Java, and C.

My goal: my ambition is to expand my knowledge and experience of hardware and software in order to improve my capacity to be better.

SKILLS

- Java Scrip
- Python
- HTML
- PHP
- C

EDUCATION

2562-2566

**Computer and Robotics Engineering,
Bangkok University**

GPA 3.53

📍 4/130 Bongkot73 Village No.2,
Khlong Song, Khlong Luong,
Pathum Thani, 12120, Thailand

CHAICHAN JANRAMTRAI

WORK EXPERIENCES

- **THE REMOTE-CONTROLLED CAR BY THE APPLICATION**
Creating a remote-controlled car and application
- **GAME CREATION**
Coding Python to create a Tetris game
- **APPLICATION**
Coding PHP to create a login and registration page
- **WEBSITE**
Coding HTML for creating an informative website about Japanese gods
- **KIBO ROBOT PROGRAMMING CHALLENGE 2022**
The 3rd prize winner in the Kibo Robot Programming Challenge, an educational program that can solve a variety of problems by programming free-flying robots on the International Space Station (ISS)
- **COFFEE VENDING MACHINE**
Graduate Project, which is a vending machine and a programmed website for ordering coffee.
- **AI FOR OBJECT DETECTION**
Creating AI for Object Detection and Segmentation for blurring using OpenCV and YOLOv8
