SUMMARY

First-class honors graduate in computer and robotic engineering, specializing in HTML, CSS, JavaScript, ReactJS, Next.js and C#. Experienced in developing web applications as a consultant for SCG, enhancing document management, inventory, and logistics systems. Skilled in problem-solving, critical thinking, and time management. Seeking a career as a Full-Stack Developer or Frontend Developer.

UNIVERSITY PROJECTS

Web Application Development

- Developed a web application for users to review a variety of services and locations, including cafes, toilets, food and travel destinations.

Kibo Robot Programming Challenge

- Won 3rd prize winner in the Kibo Robot Programming Challenge, an educational program for free-flying robots on the International Space Station (ISS)

Graduate Project

- Created a vending machine and developed a programmed website for ordering coffee

WORK EXPERIENCE

Internship, IONECT co., Ltd.

Jun 2023 - Jul 2023

- Create AI for Object Detection and Segmentation for blurring using OpenCV and YOLOv8

Consultant for SCG, Generwiz co., Ltd.

Nov 2023 - Present

- Document Management System:** Developed a web application enabling users to securely save and manage important documents and cloud storage solutions.
- Warehouse Inventory Management System:** Developed a web application for managing warehouse inventory, improving inventory tracking and control.
- Logistics and Transportation Management:** Developed a web application to optimize logistics and transportation operations
- Chilled Goods Transportation Management:** Developed a specialized web application for managing the transportation of chilled goods, ensuring compliance with temperature control requirements and enhancing delivery accuracy.
- Goods Receipt Management:** Developed a web application to manage goods receipt processes, reducing errors and improving the accuracy of inventory records.

EDUCATION

Bachelor of Computer and Robotic Engineering

Aug 2019 - May 2023

Bangkok University

- First-Class Honor
- GPA: 3.53
